

Train More Employees Faster, Cheaper, and Easier with Web Courses Created from Your PowerPoints... or Anything Else!

Problem: Your program's mission is in jeopardy from low visibility and utilization from the inability to train employees and supervisors due to lack of time, resources, or permission.

Solution: Your solution is the PowerPoint to Web Course service.

We take your PowerPoint programs and create courses that upload to your Web site. You own them. You control them--even charge fees (or not) to increase income to your organization.

Do you have a PowerPoint program "collecting digital dust" because of your inability to find time to train with it?

Get Out There

Your Web course can include professional narration, test questions, automatic answer-check features, downloadable handouts of any length, and a personalized, time-stamped, printable certificate of completion for the learner. Upload the course. Create a button on your Web site, and you're done.

What's In Your Computer?

Customized Web courses are not expensive--as low as \$397 a per course! You own your courses outright after completion, and they easily upload to your Web site.

Alcohol-drug awareness, safety, orientation, stress management, policies and regulations training, supervisory training, wellness? What's hiding your computer?

Make a web course out of one or all of your valuable PowerPoints . Bring your program back to life!
